MOHAMAD SHAZWAN HAIKAL BIN SARTUNIS

Address : Hulu Bernam, Hulu Selangor, Selangor
Phone : +60 17-457 8913
Email : haikals2002@gmail.com
LinkedIn : http://www.linkedin.com/in/mohamad-shazwan-haikal-71a690334/

PROFESSIONAL SUMMARY

Geoinformatics graduate with hands-on experience in data quality assurance, information review, data analysis, research, and processing information from multiple sources. Experienced in reviewing and validating datasets according to established procedures, identifying inconsistencies, and maintaining accuracy and attention to detail. Strong analytical thinking, critical thinking, problem-solving, and communication skills, with an interest in responsible AI, generative AI, digital platforms, and Trust & Safety operations. Able to work objectively, follow guidelines, learn new processes quickly, and collaborate effectively in a structured and fast-paced environment.

WORK EXPERIENCE

GIS Internship **July 2025 – Oct 2025**
Lat Connect 60 AI, Damansara Heights, Kuala Lumpur

- Executed GIS digitization and spatial data processing for agriculture-related applications, ensuring data accuracy and consistency through QA/QC procedures.
- Collected, processed, and analyzed geospatial data for fire detection analysis in Western Australia using GIS software and spatial analysis techniques.
- Developed and applied ModelBuilder workflows to automate geoprocessing tasks, improving workflow efficiency and reducing repetitive manual processing.
- Processed raw satellite data and satellite imagery to support GIS, agriculture, and remote sensing applications.
- Applied remote sensing techniques and completed training in above-ground biomass (AGB) estimation for geospatial analysis.
- Participated in geospatial and agriculture industry events, including AgriMalaysia, to gain exposure to industry practices, technologies, and applications.

EDUCATION

Bachelor of Science in Geoinformatics (Honours) **2022 – 2026**
Universiti Teknologi Malaysia (UTM)
CGPA: 3.55

Sijil Tinggi Pelajaran Malaysia (STPM) **2020 – 2022**
Sekolah Menengah Kebangsaan Proton City, Tanjong Malim, Perak
CGPA: 3.33

ACADEMIC PROJECTS

Final Year Project (FYP) Assessing Land Cover Changes and Future Land Cover Prediction in Lenggong Geopark Using GIS Analysis – 2026

- Conducted multi-temporal land cover change analysis using satellite imagery from 2015–2025 to assess spatial and temporal changes.
- Applied GIS-based modelling to predict future land cover scenarios for 2030 and 2035.
- Performed buffer zone analysis to assess development pressure surrounding UNESCO Geosites.
- Generated thematic maps and spatial analysis outputs to support interpretation of land cover trends and future development patterns.

Web GIS Dashboard for EV Charging Station Monitoring | Johor Bahru – 2025

- Designed and developed an interactive Web GIS dashboard integrating a dataset of 108 EV charging stations for spatial monitoring and visualization.
- Utilized Leaflet.js for interactive geospatial mapping and Bootstrap 5 to develop a responsive user interface.
- Developed a geolocation-based routing feature to identify the nearest EV charging station and display the route on an interactive map.
- Produced system architecture documentation and technical reports covering the application design, functionality, and implementation.

GIS-Based Data Centre Site Selection – 2025

- Applied Multi-Criteria Decision Making (MCDM) techniques, including Analytical Hierarchy Process (AHP), for spatial site suitability assessment.

- Integrated multiple spatial datasets to evaluate and identify suitable locations for data centre development.
- Produced site suitability maps and analytical reports to support location assessment and decision-making.

GIS Training Camp 2: Above-Ground Biomass Estimation in UTM Recreational Forest – 2025

- Collected and processed field data to estimate above-ground biomass (AGB) using GIS and remote sensing techniques.
- Applied allometric equations to calculate biomass estimates and support quantitative spatial analysis.
- Integrated remote sensing datasets to perform spatial analysis and thematic mapping of biomass distribution.
- Developed a web-based visualization page presenting methodology, statistical analysis, and AGB distribution maps.

Web GIS Application Development (POI System) – 2025

- Developed a Web GIS application for managing and visualizing flora and fauna point-of-interest data using PHP, MySQL, Bootstrap, and LeafletJS.
- Implemented CRUD functionality for spatial data creation, retrieval, updating, and deletion.
- Integrated interactive web mapping features to support spatial data visualization and management.

ACHIEVEMENTS

- **First Place**, Grab GeoStars Competition
- **Third Place**, Non-Imaging Remote Sensing Project: Wind Speed and Direction in Sarawak
- **Dean's List Award (2025,2026)**, Bachelor of Science in Geoinformatics (Honours)

CERTIFICATIONS & TRAINING

- Web GIS Development – 2026
- Grab GeoStars – 2025
- Getting Started with BigQuery GIS for Data Analysts | Google Cloud – 2026
- SuperMap Basic Training – 2026
- Talent & Competency Management Course – 2026
- Master Microsoft Excel: Apply, Analyze & Visualize Data – 2026
- Data Analytics for Organization – Universiti Teknologi Malaysia (UTM)
- English Communication Skills for Graduating Students (ECS) – Universiti Teknologi Malaysia (UTM)
- Quality Management for Built Environment and Engineering Professionals – Universiti Teknologi Malaysia (UTM)
- Design Thinking for Entrepreneur – Universiti Teknologi Malaysia (UTM)

EXTRACURRICULAR INVOLVEMENT

- Committee Member, Geoinfo Club | 2024
- Participant, Grab GeoStars Competition | 2025
- Participant, Frisbee Event, Faculty Sports Games | 2025

SKILLS & COMPETENCIES

Technical Skills

- **GIS & Geospatial Software**: ArcGIS Pro, ArcMap, QGIS, Google Earth Engine, SuperMap
- **Spatial Analysis & Remote Sensing**: Constraint Mapping, Suitability Analysis, Multi-Criteria Decision Making (MCDM), Analytical Hierarchy Process (AHP), Buffer Analysis, Zonal Analysis, DEM-Based Terrain Analysis, Network Analysis, Land Cover Classification, Shoreline Change Analysis, Remote Sensing
- **GIS Automation & Programming**: ArcGIS ModelBuilder, Basic Python
- **Web GIS & Database**: Leaflet.js, HTML, CSS, JavaScript, React.js, PHP, MySQL
- **Geospatial Data Formats**: Shapefile, GeoJSON, KML/KMZ, Vector Data, Raster Data
- **Other Tools**: Ocean Data View , FLUS, Canva, Microsoft Word, Microsoft Excel, Microsoft PowerPoint
- **Artificial Intelligence (AI) Tools**: Generative AI / Large Language Models (LLMs), Prompt formulation,Vibe Coding

Soft Skills

- Communication & Interpersonal Skills
- Analytical Thinking & Problem-Solving
- Teamwork & Collaboration
- Attention to Detail & Accuracy
- Organisational & Time Management

Languages

- **Malay:** Native
- **English:** Professional Working Proficiency
- **Indonesia:** Professional Working Proficiency
